

AUGUST 17TH, 2014

TO:

Judge William M. Nickerson
Senior United States District Judge
United States District Court
101 W Lombard St,
Baltimore, MD 21201

RE: Case No: WMN-14-750

MALIBU MEDIA, LLC vs. John Doe subscriber assigned IP address 68.33.27.132
CaseNumber 1:14-cv-00750-WMN

Dear Judge Nickerson:

Your honor, As I mentioned in my letter The very troubling thing I found that Malibu's Media porno clips appear in the wild all over the internet merely 4 to 10 minutes after the release to their website X-Art.com, and the X-Art's owners apparently know this and close their eyes and try to hide what's really going on with their shady business.? Now the big question who is behind the leaks of these movies that is given to many websites to be download by "infringers" all FREE.? And to my surprise I read online that there is a mounting proof of the Germans themselves seeding the movies in order to lure people to their honeypot scheme. The good question now....Why the forensic the Germans experts who once got thrown out by a Berlin court off shore outside arms reach of US law???

I do not trust anyone associated with Malibu Media Lipscomb's division of Germans Guardaley. Therefore I'm not confident that the Germans won't find a way to maintain the lawsuit, ramping up the legal costs and increasing the pressure to settle, even if no evidence of infringement is found.

WHY Malibu Media doesn't go after the owners of the sites distributing their movies for FREE ?? Instead Malibu Media is going after the infringers pirating its movies from websites rather than the person who is distributing , "seeding " etc... ,because all the BIG money COMES FROM THE "infringers." And not from websites owners.

If you do a Google search, you will see 100's upon 100's of websites offering free download of X-Art Malibu Media contents. If Malibu Media fights and stops the ""seeders"" or "distributors" of their movies, then piracy and downloading of their movies would STOP and the lawsuits would cease. So the question is - - "Does Malibu Media really want the piracy to stop?" The answer is big NO. They love pirates, pirates are their bread and butter, they want to build up information on pirates ... and they encourage the continued downloading of their work through the many internet sites . The point is "stopping" "piracy" would put them out of business. They do not make efforts to remove the links from where people download their contents, because they want people to continue downloading to be able to sue. So their strategy is to get personal information of the accused down loaders through the legal process, and then try to reach an agreement with them for a few thousand dollars.

The system works well, the accused find the settlement amount is usually cheaper than hiring a lawyer to defend them. In addition, many are unwilling to have their names registered in a lawsuit for downloading porn movies. It is all a well calculated scam and currently IT IS LEGAL.
